

# POSSIBLE RED FLAGS OF RESEARCH MISCONDUCT

## TIME

- Usable data are only generated when there is a pressing deadline
- Experiments are completed faster than usual

## RESULTS

- Data are too good to be true
- Findings can't be replicated by others in the lab

## LACK OF TRANSPARENCY

- Raw data can't be produced when requested
- Research materials and protocols are kept hidden
- Work is mostly done when no one else is around

### If you suspect research misconduct

contact your institution's Research Integrity Officer or ORI at [AskORI@hhs.gov](mailto:AskORI@hhs.gov)
