

Acknowledgments

I would like to acknowledge the valuable contribution of several people to this overall effort and to its predecessor Whistleblower project. Lawrence Rhoades, Ph.D., our project officer on both studies, conceived of these studies and provided invaluable guidance on the issues of interest and the interpretation of results. In addition, his careful review of our reports significantly improved their clarity and relevance to ORI concerns and to the needs of the larger scientific community. His keen interest in the results helped us understand the novelty of our findings for those involved in oversight and assurance of research integrity in PHS-funded studies.

I would also like to acknowledge my collaborators and coauthors, Jennifer Matheson and Mary-Anne Ardini, for their hard work on the projects and insights in writing the reports. We all appreciate the contributions of Tabitha Hendershot and Sheila Dominick, who carried out many of the technical and clerical activities associated with this project, respectively. Finally, we all owe a great debt as well to Darlene Bostic who produced many versions of the reports and tables and created final copy that is clear and easily readable. Her hard work under and competence are greatly appreciated.

James Lubalin
Project Director

TABLE OF CONTENTS

Executive Summary	i
1. Background and Purpose of the Project	1
a. Legislative and Regulatory Background	1
b. Purpose of This Study	2
2. Study Methods	4
a. Questionnaire Contents	4
b. Data Collection	5
c. Analyses	9
3. Analysis of Survey Response Rates	12
a. Overall Response Rates	12
b. Response Rates of Different Types of Allegations	12
c. Who Are the Exonerated Included in This Survey	16
4. Findings: Consequences of Being Accused for Exonerated Individuals	20
a. Specific Consequences of Being Accused of Scientific Misconduct	20
b. Consequences Experienced by Different Exonerated Individuals	30
c. Consequences Experienced in Different Situations	36
d. Overall Impact of Being Accused of Misconduct on the Exonerated Individuals ...	42
e. Safeguarding the Confidentiality and Restoring the Reputations of Exonerated Individuals	64
5. Conclusions and Recommendations	84
Appendix A Survey Instrument and Recruitment Letters	
Appendix B Script for Telephone Reminder Calls	

LIST OF TABLES

Table 1	Comparison of Those Completing Survey With Initial Frame and Mailout Sample	15
Table 2	Self Reported Characteristics of Exonerated Individuals Completing Surveys . .	17
Table 3	Number and Percent of Exonerated Individuals Reporting Numbers of Negative Actions	21
Table 4	Number and Percent of Exonerated Individuals Reporting Specific Negative Actions	23
Table 5	Number and Percent of Exonerated Individuals Reporting Specific Negative Actions During And/Or After Inquiry/Investigation of the Allegation	25
Table 6	Number and Percent of Exonerated Individuals Reporting Specific Persons Responsible for Negative Actions	27
Table 7	Number and Percent of Exonerated Individuals Reporting Specific Persons Responsible by Severity of Negative Action	28
Table 8	Number and Percent of Exonerated Individuals Reporting Specific Persons Responsible When Negative Actions Occurred	31
Table 9	Number and Percent of Exonerated Individuals Who Reported Experiencing Any Negative Actions by Individual's Characteristics	32
Table 10	Number and Percent of Exonerated Individuals Reporting Different Severity Levels of Negative Actions by Characteristics of Incident (Publicity)	37
Table 11	Number and Percent of Exonerated Individuals Reporting Different Severity Levels of Negative Actions by Characteristics of Incident (Support)	39
Table 12	Number and Percent of Exonerated Individuals Reporting Different Severity Levels of Negative Actions by Characteristics of Incident (Inquiry/Investigation Issues)	41
Table 13	Assessments of Overall Career Impact by Severity Level of Negative Actions Experienced	44

LIST OF TABLES (Cont'd)

Table 14	Specific Effects of Accusation on Career	46
Table 15	Summary Assessments of Impact of Accusation on Career Dimensions by Severity Level of Negative Actions	47
Table 16	Specific Effects of Accusation on Participation in Professional Activities	49
